👤 Profile

As a hard worker with great motivation, I am excited to take on a new challenge. After obtaining my bachelor's degree in animal care and having worked for two years, I discovered my true passion in programming. A career path that I therefore pursue. With my eye for detail and endless curiosity, I am ready to sink my teeth into a new project and hope to join a close-knit team to which I can contribute.

💼 Work Experience

Operator at Melexis
October 2018 - September 2020

🎓 Education

Graduate Programming, Howest Bruges
September 2020 - graduation set for June 2022
Bachelor Animal Care, Vives Roeselare
September 2015 - June 2018
Modern Languages – Sciences, College Ypres
September 2009 - June 2015

🔏 Software Skills

Through my studies at Howest, I have already been able to get a little taste of a range of skills. Within the application development pillar, the C# programming language was mainly discussed. I also learned to work with HTML, CSS and Javascript. Additionally I have seen the tip of the iceberg around working with databases (SQL)

My studies place a great deal of emphasis on working in team. Within the course of Continuous Integration, I learned to work with tools such as Git and Github.

All this means that I have a useful skillset to start with, which I am eager to expand at your company.
